

DesiAuction — print specification

The DA mark and lockups for offset, digital, screen print, vinyl and embroidery.

Colours

Name	HEX / sRGB	CMYK (ICC)	CIELAB D50	Use
 Gold	#E6B24A · 230 178 74	3 / 26 / 83 / 3	76.0 +11.9 +58.7	The tile; 'Auction' on dark
 Ink	#0B1018 · 11 16 24	79 / 72 / 56 / 75	4.5 -0.3 -5.5	Letters: 100K overprint
 Accent ink	#865D12 · 134 93 18	15 / 44 / 95 / 36	43.0 +12.6 +45.6	'Auction' on light
 Tagline, light	#58534A · 88 83 74	64 / 61 / 67 / 20	35.6 +0.8 +6.1	Tagline on light
 Tagline, dark	#9FBOCC · 159 176 204	35 / 22 / 4 / 0	71.2 -1.5 -16.4	Tagline on dark

CMYK values come from the sRGB masters through the ColorSync Generic CMYK profile (relative colorimetric). If your press runs FOGRA39 or GRACoL, separate from the RGB masters with your own profile; the Lab values are the target to proof against. Pantone: match the Lab values above on your Pantone library and approve on a drawdown. The spot file names the inks 'DA Gold' and 'DA Ink' so you can map them to the chosen Pantone references.

Black and overprint

- Letters on the gold tile and all small black type print as 100K and overprint, so a plate shift can never open a white line.
- Large dark backgrounds (the dark lockups) use cool rich black C60 M40 Y30 K100 — total ink 230%.
- Text reversed out of that black (white, gold, tagline) must knock out, never overprint. The files are already set up this way.
- The gap between the D and the slash is real empty space in every print file: nothing is painted over it.

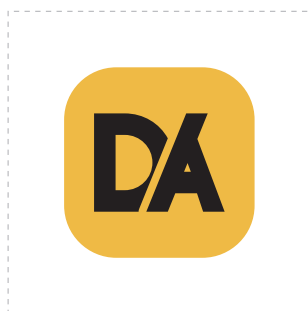

Sizes, clear space and files

Minimum sizes

The finest details are the D-slash gap (3.9% of the tile width) and the counter inside the A (3.4%). Minimums keep both open:

Offset / digital print	10 mm tile	gap 0.39 mm, counter 0.34 mm
Screen print, vinyl, signage	15 mm tile	gap 0.59 mm — above the usual 0.5 mm limit
Embroidery	32 mm tile	gap 1.25 mm (satin needs ~1.2 mm); smaller: woven label
Lockup with tagline	60 mm wide	tagline stays at least 1.2 mm tall
Below 60 mm	mark alone	or the wordmark without the tagline

Clear space

Keep a quarter of the tile's width clear on every side:
no text, edges or other logos inside the dashed line.
The same rule applies to both lockups, measured from the tile.

Files in this folder

da-mark-cmyk.pdf / .eps	The mark, CMYK, 100K overprint letters. Default for print.
da-mark-spot.pdf	Two spot inks, 'DA Gold' and 'DA Ink', for Pantone printing.
da-glyph-black-k100.pdf / .eps	One colour, 100K. Stamps, fax, embossing, laser etching, single-colour screen print.
da-glyph-gold-cmyk.pdf / .eps	One colour, gold. Foil and metallic print on dark stock.
lockup-light-cmyk.pdf / .eps	English lockup for white or light paper.
lockup-dark-cmyk.pdf / .eps	English lockup on its own rich-black panel, with clear space.
lockup-hindi-light-cmyk.pdf / .eps	Hindi lockup for light paper.
lockup-hindi-dark-cmyk.pdf / .eps	Hindi lockup on its rich-black panel.

All artwork is vector, with text converted to outlines: no fonts are needed to open or print these files.

Sizes: the mark is 50 mm, the lockups 150 mm wide. Scale freely above the minimums; never stretch or redraw.
